Signature and date: \_\_\_\_\_

## Membership in the Center

### Eligibility

The major criterion for membership in the Center is an active interest in research or teaching of molecular medicine or genetics and a record of relevant accomplishment in the field.

### Categories of Membership

The categories of membership in the Center are: Primary, Joint, Secondary, Voluntary and Full Time Affiliate.

**Primary Membership** normally results from an external search.

**Joint Membership** is conferred upon scientists who hold positions in other units at Wayne State University and who are recruited, with agreement of their existing unit, to also join the Center faculty. This requires modifying their appointment to become faculty members of both their existing unit and the Center. Primary and Joint members receive the privileges enumerated below, and also may serve as mentors for Center graduate students. Applicants for Joint Membership are asked to present a research seminar to the Center faculty as part of their application.

**Secondary Membership** is conferred upon scientists holding an academic appointment in another department of Wayne State University and having a research interest in molecular medicine or genetics and an ongoing research project being carried out with a Primary or Joint member of the Center, or having an ongoing teaching commitment in one or more Center courses.

**Voluntary Membership** (Clinical or Adjunct) is conferred upon clinicians or scientists holding an appointment at another institution and having an interest in molecular medicine or genetics and in Center activities. Voluntary faculty members who provide patient care are appointed as Clinical Assistant Professor, Clinical Associate Professor, or Clinical Professor. However, prior to completion of Board requirements, clinical voluntary faculty appointments are made at the rank of Instructor. Non-clinicians are appointed as Adjunct Assistant Professor, Adjunct Associate Professor, or Adjunct Professor.

**Full Time Affiliate Membership** is conferred upon individuals who are employed by a WSU affiliate (examples include the Detroit Medical Center, Henry Ford Health System, Oakwood and Providence Hospitals). Full Time Affiliates assist in the educating of medical students and supporting the Center's missions of teaching, scholarship and service.

*The privileges of Secondary, Voluntary, or Full Time Affiliate membership are:*

- Ability to be a co-mentor or instructor, with a Primary or Joint member, to students of the Graduate Program in Molecular Biology and Genetics and other Center educational programs
- Receive Center mailings, both electronically or by campus mail, highlighting research seminars and other educational symposia
- Receive the Center's periodic newsletter
- Other membership privileges as they become available

### Application Requirements

A current, signed Wayne State University School of Medicine formatted curriculum vitae and one page description of research interests and major accomplishments must be attached to the application for membership. A letter of support from an active Primary or Joint member of the Center is required for Secondary appointments.

## **Application Procedure**

Applications, with the required documents, may be submitted to:

Lawrence I. Grossman, PhD  
Professor and Director  
Center for Molecular Medicine and Genetics  
540 E. Canfield, 3127 Scott Hall  
Detroit, Michigan 48201  
Phone: (313) 577-5323

Prospective members are encouraged to contact the Director of the Center prior to submission of a formal application.

### **Review of Membership Applications**

Applications for Secondary, Voluntary and Full Time Affiliate membership shall be forwarded to the Director of the Center for initial review and presentation to the Faculty Recruitment Committee of the Center. The committee will make recommendations for appointments at Faculty meetings. Applicants for Center membership, based on research collaborations, will be required to present a seminar at the Center's Seminar Series. All appointments are made in agreement of regulations of the School of Medicine and any other University wide appointment regulations.

Initial review of the membership application shall be based primarily on interest in molecular medicine or genetics and already initiated collaborative research or teaching projects with Primary or Joint members of the Center. Members are expected to actively contribute towards the goals and mission of the Center. Those members who wish to be co-mentors of graduate students are expected to support the students financially and participate in the teaching of graduate courses. Secondary, Voluntary and Full Time Affiliate memberships are granted for a three year term and renewal of membership shall be based upon productivity and participation in Center activities.
